- NodeJS
- Express
- MySQL
- PostgreSQL
- MongoDB
- Redis
- React
- Vue
- Python
- Flask
- Django
- NextJS

Profile

Experienced Full Stack Engineer with a demonstrated history of working with major players in the Information Systems industry. Skilled in Javascript (NodeJS, Vue, React) Python (Flask, Django), PHP (Laravel, Wordpress). Strong background with Linux Web Servers, Micro-Services and Docker Containers.

Fullstack Developer

Deal - May 2024 ~ present

As an outsourcing developer proficient in Node.js, Angular, React, and Python (FastAPI and Flask), I've successfully contributed to diverse projects. My adaptability, problem-solving, and commitment to client satisfaction have been key in delivering high-quality solutions through effective communication and collaboration.

Stone - June 2022 ~ March 2023

As a Fullstack Developer at Stone, I've worked majorly with Python and NodeJS, building Rest APIs with FastAPI and front-end apps with NextJS. We also have a datadriven mindset and we deal a lot with CSV using Pandas as a helpful friend on the translation of spreadsheets data.

Fullstack Developer

ZPE Systems - March 2021 ~ June 2022

At ZPE I've worked as a Full Stack Developer working both with React and Django, but also building new products based on services such as Amazon Open Distro for Elasticsearch, Minio along with new design patterns.

Senior Analyst

PG Mais - October 2020 ~ March 2021

At PG Mais, I've integrated a developer squad, bringing new design patterns and different approaches to complex problems. I also learned a lot with the team, being part of new projects that built new services as product.

Fullstack Developer

Zoly - January 2020 ~ October 2020

Together with Zoly team, I've worked on complete solutions, that meet the needs of our clients, who count on big names like Claro, Cielo, Estácio, among others. Our applications are largely based on well known Design Patterns like Domain Driven Design using Express, React, Vue, MongoDB, MySQL, among other technologies.

Developer Trainee

Grupo Uni.co - 2019 ~ 2020

As a Trainee Developer, I had the opportunity to enhance resources from legacy applications and develop solutions using NodeJS, Express, Vue, ExtJS, Mongo and SQL Server.

Advanced Support Analyst

HostGator Brasil - 2018 ~ 2019

As part of the analysts team I was able to create and manage models of automation scripts in Python and Shellscript, increasing our productivity with an accurate analysis of complex problems from our customers. I was responsible for maintaining applications stability with web services on CentOS servers.

Treinee > Support Analyst I > Support Analyst II

HostDime Brasil - 2014 ~ 2017

My team was responsible to keep a large number of servers up, handling attacks, Email Issues, Migration and Resource usage of our CentOS Servers. My focus at this point was keep the uptime and stability of our servers. I've also managed to build a CLI tool in Python with Click framework to automate troubleshooting of deaily tasks.
